Internships and Training

MERN Stack Developer Training | Luminar Technolab, Kochi

- Currently pursuing a 6-month training program in MEARN stack technologies, including MongoDB, Express.js, Angular, and Node.js.
- Gaining in-depth knowledge of web development using modern technologies.
- Actively participating in hands-on projects and applying theoretical knowledge to practical scenarios.

2023 - Present

Projects

BOOKSTORE WEBSITE

- Developed and deployed a React-based Ecommerce website.
- Collaborated with a team of six members to successfully complete a group project, creating an Ecommerce website using React.

FINDMEQR

- The primary objective of FINDMEQR is to locate misplaced items, pets, and electronic devices using innovative QR code technology.
- Leveraging cutting-edge QR code technology, FINDMEQR enables seamless tracking and recovery of lost gadgets, pets, and other belongings, offering a streamlined and user-centric retrieval solution.

NETFLIX-CLONE

- Developed a React-based website replicating the functionality of Netflix.
- Integrated the website with an API for enhanced functionality.
